

Instructions for Using Quick Fuel Automated Fueling Stations:

Pull into a truck-friendly Quick Fuel facility. Walk over to any card reader and follow the simple instructions that appear on the card reader screen. It's that easy!

1. **Enter the pump #** that you'll be using.
2. **Insert the card** in the slot, and quickly remove it.

The card reader will then prompt you to enter additional information.

3. **ENTER UNIT** - Enter your unit number or vehicle number, then press ENTER.
4. You may be prompted to enter additional information. After entering the required info, press the ENTER button. Note: If prompted for Date Of Birth, enter YYMMDD (2-digit year first, then 2-digit month, then 2-digit day). Ex: April 6, 1972 would be 720406.
5. If you want a receipt: After fueling, return to the card reader you originally used. Enter your pump number, insert your card, and follow the prompt to receive a receipt.

If you are using a satellite dispenser, start pumping with the large master dispenser before activating the smaller satellite.

Please call our toll-free number (866-904-4422) if you ever have any questions about dispensing fuel, or if you notice any broken or inoperable equipment. Though our operations staff visits sites daily, your phone calls will help rectify any problems even faster. Your cooperation is appreciated!

Just call 866-904-4422 to speak to a Quick Fuel representative.
